

United States Patent Office.

RICHARD HENRY TAYLOR, OF LINCOLN, VIRGINIA.

Design No. 4,521, dated December 13, 1870.

DESIGN FOR PLOW-SHARES.

The Schedule referred to in these Letters Patent and making part of the same.

To all whom it may concern:

Be it known that I, RICHARD HENRY TAYLOR, of Lincoln, in the county of Loudoun and State of Virginia, have invented a new and useful Improvement in Designs or Patterns for Plow-Shares; and I do hereby declare that the following is a full and exact description thereof, reference being had to the accompanying drawing and to the letters of reference marked thereon.

My invention consists of a new and peculiar design or pattern for plow-shares.

The accompanying drawing represents a perspective view of my new design or pattern for plow-shares.

This design has a peculiar margin on the left, represented by the lines running through the points A, B, C, D, E, F, G, and H. This margin is intended to

fit a corresponding margin on the mold-board, and is the most important feature of my invention.

The colter M, the point I, and the share proper, J, are all cast in the same piece, having lugs, G and O, and a bolt-hole, K, for fastening the share.

Having thus described my invention,

I claim—

1 The above-described design or pattern for plow-shares, substantially as set forth.

2 The contour or joint B C D E, or the equivalent thereof, for fitting the mold-board, substantially as set forth.

RICHARD HENRY TAYLOR.
